

SRIRAAM NAGARAJAN

Cloud Security & AI Systems | AWS · SIEM · Autonomous AI Agents
Coimbatore, India • +91 97517 16283 • nosriraam7@gmail.com • linkedin.com/in/sriraam-nagarajan • [GitHub](https://github.com/nssriraam)

Cybersecurity undergraduate specializing in Cloud Security and AI Development, with hands-on experience building AWS/Azure security tooling, MITRE ATT&CK-mapped detection workflows, and autonomous AI systems. Built production-grade tools spanning multi-cloud forensics, AI-powered cloud cost and security correlation, and autonomous AI agent development. 10+ self-built projects across cloud security, detection engineering, and AI automation.

EXPERIENCE

Cyber Security Trainer

Jul 2025 – Present

Pynevera • Internship • Hybrid

- Deliver cybersecurity training sessions to students as part of Pynevera's technical team, covering network security, threat awareness, and security fundamentals
- Develop and structure course content for a private limited tech education company, translating complex security concepts into accessible curriculum for beginner-to-intermediate learners

KEY PROJECTS

Full portfolio: github.com/nssriraam

Rika — Autonomous AI Assistant [↗ GitHub](#)

Apr 2026 – Jun 2026

Python · Groq API · Ollama · ChromaDB · FastAPI · Playwright · Multi-Agent Orchestration

- Architected a fully local autonomous AI assistant in Python with voice-first interaction, 6-layer persistent memory (vector, graph, SQL), OS-level automation, and multi-agent swarm orchestration — achieving sub-300ms voice response latency with zero cloud data exposure
- Integrated a modular security assessment engine featuring automated surface discovery, vulnerability chain mapping, and MITRE ATT&CK-aligned findings synthesis — delivering structured reports via automated Telegram notification pipeline

Argus — Multi-Cloud Forensics & Detection Platform [↗ GitHub](#)

Jun 2026

Python · AWS Boto3 · Azure REST API · Flask · SQLite · MITRE ATT&CK

- Built a multi-cloud forensics platform ingesting AWS CloudTrail and Azure Activity Logs, powered by a 26-rule MITRE ATT&CK detection engine across 7 tactics, behavioral baseline anomaly detection, and SHA-256 chain-of-custody evidence integrity
- Engineered attack chain correlation with 10 pre-built kill chain patterns linking isolated events into multi-step attack narratives — integrated VirusTotal/AbuseIPDB threat intelligence enrichment and automated executive PDF reporting with remediation mappings

Marrow — Where FinOps Meets SecOps [↗ GitHub](#)

Jun 2026

Python · Flask · DeepSeek V4 Pro · Fireworks AI · AMD MI300X · Docker · SQLite

- Built an AI-powered platform that correlates AWS billing data with Security Hub findings per resource, bridging the gap where FinOps meets SecOps — generating unified terminate/patch/rightsize verdicts that resolve cost and risk in a single decision
- Powered by DeepSeek V4 Pro via Fireworks AI on AMD Instinct MI300X infrastructure for Chain-of-Thought reasoning across correlated datasets — ranked 14-15 out of 76+ submissions at AMD Developer Hackathon ACT II, with confidence-scored recommendations and stakeholder-ready PDF export

SSH Honeypot & Attack Analysis

Mar 2026

Cowrie · AWS EC2 · Python · MITRE ATT&CK

- Deployed a Cowrie SSH honeypot on AWS EC2 (EU-North-1) exposed to live internet traffic, capturing 16 real attack sessions within 35 minutes including credentials, commands, and attacker TTPs
- Mapped 4 observed techniques to MITRE ATT&CK (T1110.003, T1082, T1087.001, T1105), performed malware analysis on an intercepted live wget payload — producing a threat intelligence report with 5 defensive recommendations

Additional Projects: AWS CSPM Tool, AI-Powered CloudTrail Anomaly Detector, SOC Incident Case Study, Wazuh SIEM Deployment — github.com/nssriraam

ACHIEVEMENTS

Ranked 2nd Place — Black Cipher CTF, Nullgrids National Level Competition — applied offensive and defensive security skills under competitive conditions

Ranked 31st out of 500+ participants — DCG 91422 Coimbatore CTF (DEFCON Group Chapter), Kumaraguru College of Technology, Apr 2026

Ranked 14th out of 480+ teams — AMD Developer Hackathon ACT II (lablab.ai · Track 3) with Marrow, built in 5 days using AMD-hosted DeepSeek V4 Pro — received public commendation from lablab.ai on LinkedIn

EDUCATION

United Institute of Technology, Coimbatore

Bachelor of Engineering in Computer Science & Engineering (Cyber Security)

CGPA: 8.40 / 10 • **Relevant Coursework:** Computer Networks, Network Security, Operating Systems, Cloud Computing, Digital & Mobile Forensics

TECHNICAL SKILLS

Cloud Security: AWS IAM, EC2, S3, CloudTrail, Azure Activity Logs, CSPM, Boto3, Security Groups, Firewall Rules, Vulnerability Assessment, Cloud Monitoring, Cloud Detection, Multi-Cloud Security, AWS Security Hub

Detection & SOC: Splunk, Wazuh, SIEM, Detection Engineering, SOC Operations, Incident Triage, Alert Triage, Log Analysis, Security Event Correlation, Security Analytics, Security Automation

Threat Analysis: MITRE ATT&CK, Threat Hunting, Threat Intelligence (VirusTotal, AbuseIPDB), IOC Extraction, Malware Analysis, Anomaly Detection, Threat Detection, False Positive Analysis, Attack Chain Correlation, Behavioral Baseline Analysis, Phishing Analysis

AI & Engineering: Python, Bash, REST API, Flask, Docker, SQLite, Groq API, Ollama, ChromaDB, FastAPI, DeepSeek V4 Pro, Fireworks AI, Multi-Agent Orchestration, LLM Integration, MCP Protocol, ReportLab, JSON Log Parsing

Networking & OS: TCP/IP, DNS, HTTP/S, SSH, Windows Event Logs (4624/4625), Linux Auth Logs, Network Protocol Analysis, IDS/IPS

Certifications: Fortinet NSE1 & NSE2 (2026), Cisco Intro to Cybersecurity (2026), CCEP — Red Team Leaders (Nov 2025), PCAP: Python Essentials — Cisco (2022)
